DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-16 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The applicant's assertion in claim 9 that their article of manufacture is "*capable of*" causing operations is non-limiting language, as such this claim does not require that the claimed article of manufacture actually do anything, as such claims 9-16 are rejected under 35 U.S.C §101 for failing to provide a useful concrete and tangible result.

Claims 17-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 17-24 are rejected under 35 U.S.C §101 because they are directed towards a system which in light of the specification appears to be software *per se*.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,913,209 (henceforth referred to as Millett).

Claim 1 is anticipated by Millett as follows: **A method for matching character sets, comprising: storing one or more data set files (figure4; C4:L38-39); creating one or more character set files, wherein each character set file is associated with a character set and includes indexes associated with the one of more data set files (figure 4; C4:L38-65); receiving a request specifying one or more character sets (figure 4; C3:L4-6); and identifying one or more of the data set files that contain one or more of the requested character sets using the indexes in the character set files (figure 4; C3:L6-9).**

Claim 2 is anticipated as in claim 1, further referring once again to figure 4 and C10:L35-65 and C14:L41-46, in which comparisons are made between multiple index arrays.

Claim 3 is anticipated as in claim 2, further referring again to figure 4 and also C15:L6-12.

Claim 4 is anticipated as in claim 2, further referencing figure 4, C15:L6-12 and C15:L32-40.

Claim 5 is anticipated as in claim 2, further referencing figure 4, C15:L6-12 and C15:L32-40.

Claim 6 is anticipated as in claim 2, further referencing figure 4 and C14:L47-56.

Claim 7 is anticipated as in claim 6, further referencing figure 4 and C14:L43-46.

Art Unit: 2166

Claim 8 is anticipated as in claim 7, further referencing figure 4, C15:L4-13 and C15:L32-40.

Claims 9-16 & 17-29 are rejected using the same rationale as applied to claims 1-8.

Conclusion

The prior art made record of on form PTO-892 and not relied upon is considered pertinent to the applicants' disclosure.
